REVISED EXHIBIT A

STATEMENT OF WORK

University Lakes LLC shall plan, design, and construct certain improvements to the University Lakes System. The University Lakes System encompasses six lakes – University Lake, Crest Lake, Campus Lake, College Lake, City Park Lake and Erie Lake – which surround the campus of Louisiana State University.

Currently, the University Lakes System is in poor and declining health. The lakes have silted in over time, impairing water quality and habitat conditions, as well as reducing the ability of the lakes to help manage stormwater and reduce flood risk. This Project will include excavation and/or dredging of five of the six lakes (City Park, Erie, Crest, Campus, and College Lakes) as well as a portion of University Lake, to increase their depth in order to improve water quality and flood risk reduction potential, as well as foster the creation of new habitat. Earthwork, grading, and plantings will also be done as part of the Project to improve drainage, reduce flood risk, and restore natural environmental functions. In addition, flood control structures may be removed, improved, or constructed to improve the lakes' ability to mitigate flood risk. The Project will also address conflicts with underground utilities as necessary, and the excavation and repair of roadways and paths in areas where drainage and/or environmental restoration improvements are required.

Planning and design for the aforementioned construction activities will include environmental review, permitting, surveying, geotechnical analysis, schematic and final design.

REVISED EXHIBIT B

Construction	\$ 7,300,000
